

## 2020 Doctoral Research Residency Program

### Guidelines for Application (for PhD candidates enrolled in affiliated universities)

The CCA, within the framework of the Doctoral Research Residency Program, offers research grants for summer residencies to support PhD students enrolled in affiliated universities pursuing archival research based on our Collection as well as thematic research that contributes to the CCA's lines of investigation.

Applications to the CCA Doctoral Research Residency Program for PhD candidates enrolled in affiliated universities must be nominated by their respective home institution. Applications and nominations follow internal deadlines set by individual departments and schools. Complete applications should include the following:

- **Abstract of PhD project** (500 words), including the name(s) of the supervisor(s)
- **Research Proposal** (500 words), identifying the items in the CCA Collection of interest, as well as contributions to the CCA's lines of investigation
- **Curriculum Vitae**, detailing education, professional experience, publications, awards, and working languages, as well as any other relevant information

Applications will be reviewed by the CCA and the Coordinators of the respective doctoral programs and should be received by **Monday 9 March 2020 at 5 pm** (Eastern Standard Time). Final selections will be made in collaboration between the program directors and the CCA.

Notification date: beginning of April 2020.

### Eligibility and Terms of Residency

The Doctoral Research Residency Program provides a monthly stipend of \$2,000 CAD to cover living expenses of each recipient for a residency in Montréal. The stipend is non-renewable.

Residencies at the CCA—ranging from four to six weeks, with the length determined by each home institution—must take place from mid-June to mid-August 2020. Attendance at a one-week seminar—a topical “Toolkit for Today” takes place in the first half of July and provides scholars with new concepts, tools, and methods for their own research—is required.

Candidates will be selected according to a set of criteria, including the originality and relevance of the proposed research, and how it relates to both the overall PhD project and to the CCA's main lines of investigation.
