

2023 CCA Doctoral Research Residency Program

Application guidelines for PhD candidates enrolled in non-affiliated universities

Applications to the CCA Doctoral Research Residency Program for PhD candidates enrolled in non-affiliated and non-Canadian universities must be submitted through the [designated online application portal](#). Submissions should be made in either English or French. The online application should be complete at the time of submission and include all of the following:

- **Abstract of PhD project** (500 words), including the name(s) of the supervisor(s)
- **Research Proposal** (500 words), identifying the items of interest in the CCA Collection of interest, as well as contributions to the CCA's lines of investigation
- **Curriculum Vitae**, detailing education, professional experience, publications, awards, and working languages, as well as any other relevant information
- **Letter of Confirmation from the school**, indicating that the applicant's home institution supports the application and the length of the residency, and will cover its share of the stipend
- **Letter of Support by PhD advisor**, commenting on the applicant's status as doctoral student and his/her gain from archival research at the CCA for the dissertation project. This letter should be sent by the PhD advisor via email directly to studium@cca.qc.ca

The complete application should be submitted through the CCA [online application portal](#) no later than **5 February 2023, at 11:59 pm** (EST). Documents faxed, mailed, or sent electronically, other than the Letter of Support by PhD advisor, will not be accepted.

Notification date: early March 2023

Eligibility and Terms of Residency

All PhD students currently enrolled in a doctoral program in history and theory of architecture, urban planning, humanities, communications, science and technology, environmental studies, and Indigenous studies are eligible, regardless of citizenship. A monthly stipend of CAN \$2,000-3,000 to cover living expenses will be allocated to each recipient for a residency in Montréal. The applicant's home institution will cover 60% of the stipend and the CCA will cover 40% of the stipend. The applicant's home institution will invoice the CCA for its share of the stipend and will transfer the funds directly to the applicant. The stipend is non-renewable.

Residencies at the CCA—ranging from four to six weeks, with the length determined by each home institution—must take place between mid-June and August 2023. Attendance at a one-week seminar—a topical “Toolkit for Today” that takes place in the summer and provides scholars with new concepts, tools, and methods for their own research—is required (exact dates to be confirmed).

Candidates will be selected according to a set of criteria, including the originality and relevance of the proposed research, and how it relates to both the overall PhD project and to the CCA's main lines of investigation.
